## RI-JET 100: Fire resistance

Following the norm ISO 3795:1989, the self-extinguishing of RI-JET 100 has been tested and verified in our laboratories.

The method applied is the following:

- ✓ Application of the self-adhesive film on an aluminium plate 2mm thick;
- ✓ The self-adhesive film was set to fire with the help of a blowpipe for 30 seconds;
- ✓ The plate was removed from the flame;
- ✓ After 30 seconds, the self-extinguishing of the self-adhesive film was tested.

With regard to RI-JET 100, we have verified that the film does not burn.

Therefore, we can conclude that RI-JET 100 self-adhesive material is self-extinguishable according to the norm ISO 3795:1989.
